## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-4, 6, 9, 15-17, 19-22 and 26-33 are allowed.
2. The following is an examiner's statement of reasons for allowance: the examiner has determined that the applicant is correct in regards to the allowability of the combination of limitations as currently drawn.
3. The claims as drawn describe a device that automatically determines whether a client needs to be upgraded in response to a server upgrade, wherein the server computer's upgrade affects client – server interoperability, and wherein the upgrade is necessary to restore that interoperability. Yet the device does not automatically upgrade the client, but rather alerts the client and allows the client's user to manually control whether or not to upgrade the system.
4. In the art of upgrading a client, wherein the need to upgrade is as important as to fix the interoperability of the client with the server, and wherein the device determines the importance of the upgrade, all known art has taught away from providing the client's user with the ability to delay or deny the application of the upgrade. Thus, there would be no motivation to combine these limitations. The combination of limitations is therefore novel.
5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. They regard further background teachings on the subject.
